ELECTRICAL INSTALLATION CONDITION REPORT - UP TO 100A SUPPLY Requirements For Electrical Installations - BS 7671

Certificate Number:

1 DETA	ILS OF T	HE PERS	ON ORDERING	G THE REPOR	RT					
Client:	MacLeod Estate									
Address:	Dunvegan Castle and Gardens, Dunvegan, Isle of Skye									
2 REAS	ON FOR	PRODUC	NG THIS REP	ORT						
Reason for producing this report:										
Landlords s	safety repo	rt.								
Date(s) on which inspection and testing was carried out: 03/08/2023										
3 DETA	ILS OF T	HE INST	ALLATION WE	IICH IS THE	SUBJECT	OF TH	IIS REPORT			
Installation Address: Rose Valley, Dunvegan Castle and Gardens, Dunvegan, Isle of Skye										
Estimated ag	e of wiring	system:	30 years	Evidence of	additions/	Ves	if yes, estimated	ado.	5	years
			,	alterations:			ast inspection:	age.	N/A	years
Installation records available? (Regulation 651.1) No Date of last inspection: N/A **EXTENT AND LIMITATIONS OF INSPECTION AND TESTING**										
Extent of the electrical installation covered by this report:										
100% of the installation in the main house										
Agreed limitations including the reasons (see Regulation 653.2):										
Characteristics of Primary Supply Overcurrent device. No testing of HVAC control cables. Routing of cables in										
prescribed zones or within mechanical protection.										
Agreed with:		Client								
Operational limitations including the reasons: None										
None										
The inspection and testing detailed in this report and accompanying schedules have been carried out in accordance with BS										
7671: 2018 (IET Wiring Regulations) as amended to 2022. It should be noted that cables concealed within trunking and conduits, under floors, in roof spaces, and generally within the fabric										
of the building or underground, have not been inspected unless specifically agreed between the client and inspector prior to the inspection. An inspection should be made within an accessible roof space housing other electrical equipment.										
<u>'</u>	'			<u> </u>			, ,			
See page 3 for a summary of the general condition of the installation in terms of electrical safety.										

Overall assessment of the installation in terms of it's suitability for continued use*:

SATISFACTORY

* An unsatisfactory assessment indicates that dangerous (Code C1) and/or potentially dangerous (Code C2) conditions have been identified.

RECOMMENDATIONS

 $\sqrt{}$ here the overall assessment of the suitability of the installation for continued use on page 1 is stated as 'UNSATISFACTORY', I/We recommend that any observations classified as 'Code 1 - Danger Present' or 'Code 2 - Potentially dangerous' are acted upon as a matter of urgency.

Investigation without delay is recommended for observations identified as 'FI - Further Investigation Required'.

Observations classified as 'Code 3 - Improvement recommended' should be given due consideration.

Subject to the necessary remedial action being taken, I/we recommend that the installation is further inspected and tested by:

5 Years

Note: The proposed date for the next inspection should take into consideration the frequency and quality of maintenance that the installation can reasonably be expected to receive during its intended life. The period should be agreed between relevant parties.
